

Structural Foundations of Health (Part 2)

Today

- Policy & health
- Labor conditions
- Community vs. population assessments
- **Group exercise** (20 min)

7. Policy & Health

7. Policy Examples

Policies that promote health:

- EITC (income support)
- Medicaid expansion
- Paid leave

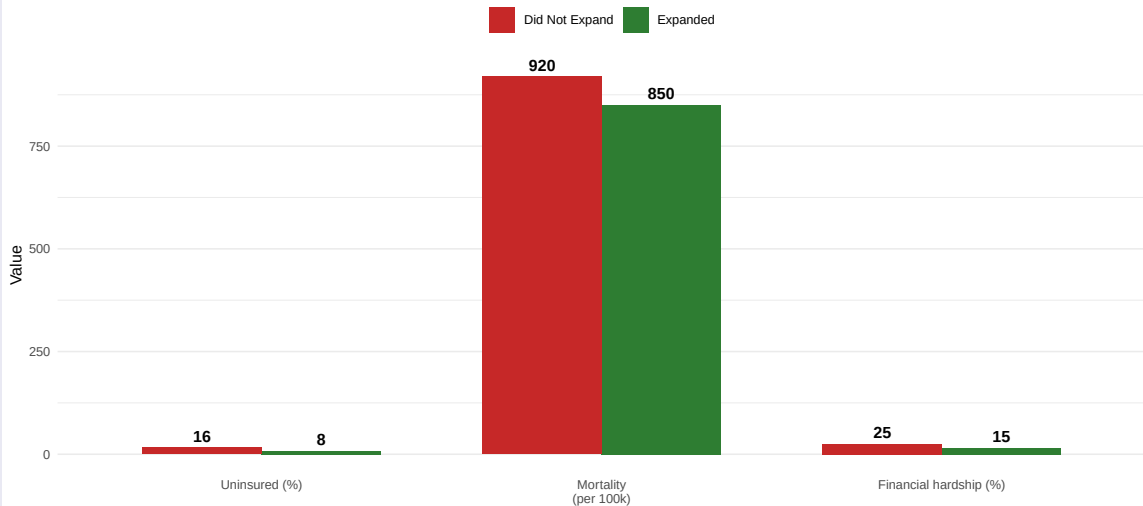

Policy decisions have measurable health consequences

Policies that harm health:

- Mass incarceration
- Restrictive zoning

7. Medicaid Expansion Impact

Medicaid Expansion Impact (2014–2020)

Sources: Sommers et al. (2017), Miller & Wherry (2019)

8. Labor Conditions

8. Work Affects Health

Physical hazards:

- Chemical exposures
- Repetitive strain

- Injury risk

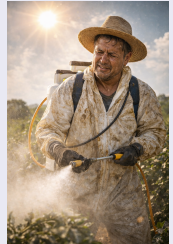

Psychosocial hazards:

- High demand + low control
- Effort-reward imbalance
- Job insecurity

Environmental exposures:

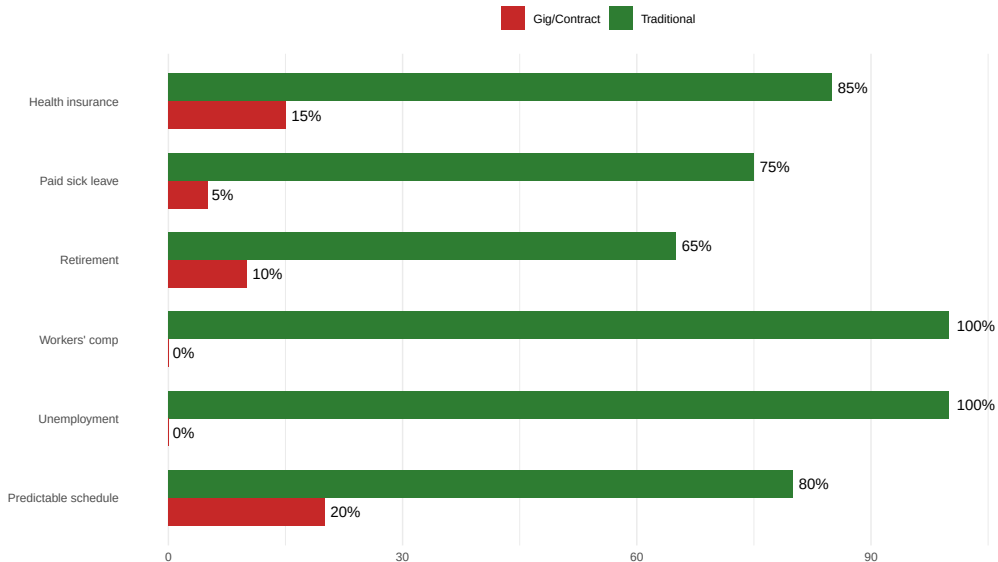

- Pesticides
- Toxic chemicals

- Heat stress

8. Gig Economy

Traditional vs. Gig Economy Benefits

9. Community vs. Population Assessments

9. Two Approaches

Community Assessment

- Specific neighborhood
- Involves residents
- Assets + needs
- Action plan

Example: South Side Chicago food deserts
Both answer different questions

Population Assessment

- Larger area
- Administrative data
- Disease patterns
- Surveillance

Example: CDC state diabetes rates

Group Exercise

Community Analysis (20 min)

Your task:

- 1 Analyze your community scenario
- 2 Identify top 3 structural determinants
- 3 Recommend 1 intervention
- 4 Present in 2 minutes

Community Analysis (10-20 min)

Groups:

- Rural coal town
- Urban food desert
- Immigrant community
- Native reservation
- Gentrifying neighborhood

Analysis Framework

Consider:

- **Social:** Capital, discrimination
- **Economic:** Income, jobs
- **Environmental:** Built environment, hazards
- **Policy:** Housing, labor, healthcare

Be specific! Use scenario details

Thank you!

Now: Break into groups
